Burning Rock Announces Results of 2021 Annual General Meeting

GUANGZHOU, China, December 28, 2021—Burning Rock Biotech Limited (NASDAQ: BNR, the “Company” or “Burning Rock”), a company focused on the application of next generation sequencing (NGS) technology in the field of precision oncology, today announced that all shareholder resolutions proposed at the Company’s 2021 annual general meeting held today were duly passed. Specifically, the shareholders passed the following resolutions approving:

1. the ratification of the appointment of Ernst & Young Hua Ming LLP as auditor of the Company for the fiscal year ending December 31, 2021 and the authorization for the directors of the Company to determine the remuneration of the auditor;
2. the re-election of Yusheng Han, Gang Lu and Shaokun Chuai as directors of the Company;
3. the approval, confirmation and ratification of the adoption of the 2021 Long-term Equity Incentive Plan and the grant of options thereunder, the vesting of which is tied to the Company’s future stock performances; and
4. the authorization of each of the directors of the Company to take any and all action that might be necessary to effect the foregoing resolutions as such director, in his or her absolute discretion, thinks fit.

About Burning Rock

Burning Rock Biotech Limited (NASDAQ: BNR), whose mission is to Guard Life via Science, focuses on the application of next generation sequencing (NGS) technology in the field of precision oncology. Its business consists of i) NGS-based therapy selection testing for late-stage cancer patients, with the leading market share in China and over 273,000 tissue and liquid-based tests completed cumulatively, and ii) NGS-based cancer early detection, which has moved beyond proof-of-concept R&D into the clinical validation stage.

Burning Rock Reaffirms 2021 Revenue Guidance of RMB500 Million

Guangzhou, China, December 29, 2021 – Burning Rock Biotech Limited (NASDAQ: BNR, the “Company” or “Burning Rock”) today announced that, based on the latest operating trends, the Company expects its 2021 revenue to be at or slightly above RMB500 million.

The Company is pleased with the recent progress achieved, despite elevated COVID impact that has been ongoing since the beginning of November, including the first diagnosed Omicron case in China and increased lock-downs in December. Despite the COVID challenges, the Company’s overall business volumes in November and December increased compared to that of September and October. In-hospital testing volumes have continued to grow, with November and December volumes slightly higher than that of September and October, demonstrating resilience of this important commercial channel. Central-lab testing volumes also saw sequential improvement, supported in part by recent commercial launch and good initial market uptake of two licensed-in products, DetermaRx (a risk stratification test for early-stage lung cancer patients, further details of which can be found at <https://ir.brbiotech.com/news-releases/news-release-details/burning-rock-announces-exclusive-licensing-risk-stratification/>) and myChoice (an FDA approved test for homologous recombination deficiency, or HRD, further details of which can be found at <https://ir.brbiotech.com/news-releases/news-release-details/burning-rock-announces-licensing-myriad-mychoicer-tumor-testing/>).

The Company expects to discuss its fourth quarter results in further details at the time of its Q4 results announcement in March 2022.

About Burning Rock

Burning Rock Biotech Limited (NASDAQ: BNR), whose mission is to guard life via science, focuses on the application of next generation sequencing (NGS) technology in the field of precision oncology. Its business consists of 1) NGS-based therapy selection testing for late-stage cancer patients, with the leading market share in China and over 273,000 tissue and liquid-based tests completed cumulatively, 2) Global pharmaceutical services on biomarker detection and companion diagnostics developing, and 3) NGS-based cancer early detection, which has moved beyond proof-of-concept R&D into the clinical validation stage. The Company is devoted to developing innovative and reliable NGS-based testing products and advancing oncology precision medicine solutions.
